ACCREDITED

Corporate Social Responsibility initiative of down town hospital 2021-2022

The focus is on key interventions that make an impact in the areas of **Sanitation, Hygiene Promotion and Education**. Over the last few years, the company has been successful in scaling up CSR engagements in Guwahati that impact the local communities.

Project: Provision of water filters at schools

Project Description: The Company has provided water filters for school.

Project Location: Guwahati, Assam

No. of Schools: 11

Clean water supplies are vital to any thriving community, reducing exposure to water-borne diseases and easing the burden of ill health. Therefore, as a part of its commitment to provide access to clean water, sanitation and hygiene in communities where it operates, **down town hospital** has constructed drinking water facilities in schools by setting up water filtration systems relying on 3 filtration processes.

- a. Particulate Filtration using natural filtration media
- b. Adsorption System
- c. Photo catalyst Reactor

There are 11 such schools in Guwahati which have been provided with clean drinking water, transforming the lives of students of these schools.

down town hospital has partnered with Globinno Engineering Solutions to monitor and maintain the filtration systems and water tanks. A thorough check-up and cleaning of the water tanks is also conducted as per the requirement.
